FREELANCE PROJECTS

Since Jan 2024, I've been focused exclusively on freelance projects.

Croatia Property Sales   2021 – now

- Built a project with a notable positive business impact for one of the leading real estate agencies in Croatia.
- It consists of the main user-facing website and supporting systems for managing the data, sending newsletters, sharing information with marketing partners, and flagging inquiries as spam.
- Helped hire and coordinate design and SEO consultants.

WORK EXPERIENCE

Full-stack developer at Sensorium, remote

LexisNexis PatentAdvisor   Dec 2018 – Jan 2024

- Worked on LexisNexis PatentAdvisor, a patent prosecution solution.
- Led an incremental rewrite of the main customer-facing app in Typescript and React, with the atomic design methodology. It massively simplified the addition of new features in comparison to the legacy server-side rendered app.
- Led an introduction of automated Cypress end-to-end tests which lowered the need for an external QA department to a few internal QA engineers.

Eurodata ProPep   Oct 2017 – Dec 2018

- Worked on Eurodata ProPep, a workforce management solution.

Full-stack developer at Adriatic.hr, Croatia

- Worked on Adriatic.hr, an accommodation rental website where I was hired as   Feb 2017 – Oct 2017
  the highest-rated attendee of their series of lectures which they used to find new junior developers.
- Introduced searching on a map, inspired by Airbnb at the time.

STRENGTHS

- *Generalist.* I enjoy handling everything from the infrastructure to the UI. I strive to be technology-agnostic, but my preferred tools at the moment are: React with Typescript, Django (Python), MySQL, Docker, Redis, Ansible, Cypress, and test-driven development.
- *Communication.* I highly value clear and concise communication.
- *Working with the UX teams.* I enjoy working closely with the product and UX teams in creating smooth user experiences. My interest in UX helps me communicate with the UX teams more effectively.
- *Security.* I played around with cybersecurity basics on the TryHackMe platform. It made me aware of the most common security issues, which I then started finding in the projects I was working on.

MISCELLANEOUS

- *Travel.* I love traveling and meeting new cultures. I've been to India, Peru, Kenya, Japan, the USA, and others.
- *Languages.* I speak Croatian, English, Spanish, and can read some French.
